Mission Statement

“ To connect and secure **the world** with infrastructure solutions for computing and protecting intellectual and physical assets. ”

COMPANY OVERVIEW

LAB Information Technology Incorporated (LAB USA), was founded in 1998 and incorporated in 1999. We have offices in Chicago and Houston. Forward-thinking, security-conscious businesses and government agencies within the USA, Europe, and Africa make up our customer base. Our services focus on deploying and managing the information technology and security infrastructure that powers businesses. From video surveillance systems to cloud managed services, we help our clients improve operational efficiency while protecting both physical and intellectual assets.

Mission

"Connect and secure the world" - It is our goal to have a world that is connected electronically with information available to anyone. As well with everyone's intellectual and physical property safe from misuse or destruction.

Value Proposition

"Results Engineered" - There are variations of results within every solution from levels of automation to degrees of security. We deliver scalable and cost effective solutions tailored to clients' specific goals.

Core Values

Integrity - Matching actions with the goals of our clients. Integrity is the basis of our success and the foundation for building long-term relationships.

Vision - A never-ending quest for excellence. Behind the products are dedicated people building technology solutions through innovation and teamwork.

Satisfaction - Dedicated to customer satisfaction and providing excellence in more effective and productive solutions.

Cloud Managed Services

Strategies for deployment of secure computing and data management solutions

- Amazon Web Services (AWS)
- Application, email and web hosting
- Microsoft Office 365 and Azure
- Off-site backups and data repository
- Remote systems management and support
- Website and content management

LABUSA **Cloud Managed Services** provide computing, storage, and application services at a lower IT cost.

Reducing the labor and frustration in deploying the IT infrastructure and software allows you to focus on the core competencies of your business.

Our strategy is to provide feature-rich, proven solutions in state-of-the-art, fault-tolerant datacenters and cloud platforms.

Integrated Security

Integrating physical and information security technology for more control and reliability

- Access control systems (Biometric, RFID, and Password)
- Business disaster analysis and readiness planning
- Central management command centers
- Information and physical security assessment
- Integrated physical, data and network security systems
- IP-Based and analog surveillance systems

LABUSA **Integrated Security** solutions feature analog and digital surveillance and three-factor authenticating access control systems.

Our advantage is that we focus on the unified management of video surveillance and other safety and security devices.

Our solutions provide you a greater advantage in mastering your security.

Professional Services

*Combining strategy, people and technology
to assist clients in reaching their goals*

- Installation and on-call support
- Product procurement
- Project based staffing and outsourcing
- Proof-of-concept and solution testing
- Security consulting and management services
- Technology planning and project management

LABUSA **Professional Services** provides product sales and support in IT and security.

Our technical resources help you get you up and running quickly from new deployments to problem resolutions.

We all share common values in – quality service, integrity, and customer satisfaction.

Success Stories

A financial organization incorporates security management policies based on the U.S. Department of Defense security standards.

When a large financial organization required improvements to its computing infrastructure to support new financial applications, they engaged LABUSA to provide consulting and professional services.

National hotel chain delivers higher level security standards through low cost video surveillance equipment, training, service and support.

When a midsize hotel chain struggled with improving security in their network of nationwide hotels, they turned to LABUSA to propose a solution. LABUSA presented the platform that enabled them to master their security.

Government agency refreshes the technology and achieves a higher level of security and more functionality in its mission-critical web-based application.

A government agency wanted to refresh the hardware and software technology to increase security and get more functionality out of its mission-critical web-based business application. LABUSA provides the equipment, deployment and application support that allowed them to reach their goals.

“LABUSA is a very professional organization; they display the kind of work ethic that we need in all of our future contractors.”

- Director for Policy and Service U.S. Army

“Your (LABUSA) staff is very experienced and knowledgeable. We appreciate the service provided.”

- VP of Technology for Financial Services Company

“LABUSA surveillance solution is the best I seen for price and performance.”

- Director of Loss Prevention for a National Hotel

“20 Most Promising AWS Solution Provider of 2014.”
